## SUMMARY

I am a full-stack programmer and web developer, particularly proficient in JavaScript, ruby and Python. Quick to adapt to new environments and pick up new skills, I am also a professional archivist, event planner, fluent in Japanese and excellent at office and network management. All of my past projects have led me towards my true passion: helping people be healthier and happier by building positive products that are more efficient and intuitive than anything you've seen before.

## SKILLS

**LANGUAGES:** JavaScript, jQuery, HTML, CSS, PHP, LESS, Sass, ruby, Python, Java

**FRAMEWORKS:** Ruby on Rails, Sinatra, React, AngularJS, WordPress, Node.js, Cordova

**DATABASES:** PostgreSQL, Redis, Parse, Elasticsearch, Oracle, MySQL, NoSQL

## PROJECTS

- Verona** Verona is a swipe app for finding online friends with seemingly opposite beliefs to connect through their hobbies and passions. A winner of Fast Company's Most Innovative Companies of 2016, its goal is to provide a platform for a new kind of conversation. <http://www.getverona.com>
- JavaScript and Node app using Parse as a database
  - Backend designed using pure JavaScript, frontend with HTML and jQuery
  - Acquired over 100,000 users and numerous awards
- Juke** Juke is a playlist collaboration app built using Ruby on Rails, JavaScript, and the Spotify API. Juke allows a host to invite guests to view, vote, and suggest songs on a playlist of the host's choosing. Those suggestions can be accepted by the host, and the playlist can be ordered according to vote count. <http://jukeapp.herokuapp.com>
- JavaScript and Rails app with HTML and jQuery for frontend
  - Spotify API Integration, Rails and JavaScript-to-Spotify search engine and pure CSS and HTML design.
- QuestOn** Scavenger Hunt game and activity app. Follow clues to finish the quest and claim your reward. (In Development)
- Rails application with Cordova for Android and iOS integration, JavaScript and jQuery for the frontend.
  - Uses Google Maps and Geo-location API to track player's vicinity to clues.
  - Encourages exploration and exercise while playing a game by yourself or with friends.

## EMPLOYMENT

- Jan 2007 - Present **Freelance Web Developer and Consultant**  
Web and app design for various clients.  
Most recent contracts: Red Button LLC, Verona, UploadVR Collective, Vulcanize  
Full-stack Agile development with Rails, PHP, Python and JavaScript. Primarily SQL or Parse with Google Analytics for databases.  
HTML, CSS, jQuery and PHP for frontend.
- May 2015 - Aug 2015 **DGA Security Systems, Customer Security Specialist**  
Programmed physical security and camera systems for clients. Arranged emergency dispatches for clients with tripped alarms. Spoke with clients over the phone or in person to discuss repair of systems with timeframe of completion. Handled digital repair of security systems.
- Jul 2010 - Sep 2014 **The Offices of Howard M. Holtzmann, Senior Archivist and Executive Assistant, New York, NY**  
Built and maintained an archival database system for scanning, cataloguing and publishing Judge Holtzmann's works. Systems used for programming and maintenance of database include JavaScript, jQuery, SQL, and various analytics. Managed team workflow and meetings. Planned trips and set up meetings and presentations. Took calls and managed communications through Outlook. Performed upkeep and repair of office hardware and software. Managed office network. Worked as an event manager, which involved location scouting, decorating, and hiring. Oversaw construction, home contracts, and household renovations.
